

Since 1978, we've believed that construction is as much about art as science. It's about a strong vision and the creation of a structure with enduring qualities. It's about creative problem-solving and the willingness to deliver above & beyond the expected. It's about passionate teams and long-standing partnerships built on trust, performance, and lasting value.

"Edifice, Inc.'s performance on our project was absolutely outstanding. From the guidance and counsel they provided prior to being selected as General Contractor for the project, to their ability to keep costs in line, to the build-out and beyond, they have been trusted advisors and partners. The level of ownership they took with our project exceeded our expectations. Our project presented two significant challenges: a very compressed time frame and facility regulations requiring all work be performed after-hours. The team at Edifice did a great job managing those challenges and always presented effective solutions proactively. If we were to tackle this project ten more times, we would select Edifice, Inc. every time.

Vincent Amico, Office Administrator, Bradley Arant Boult Cummings, LLP
